DETAILED ACTION

Claim Rejections - 35 USC § 112

1. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

2. I. Claims 1, 5 and 8 and respective dependent claims are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention.
- II. Claim 1, 5 and 8 and respective dependent claims are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the enablement requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention.

A. Limitations as recited in claim 1, line 4 include “the top or bottom face is electrically connected with the circuit wiring”.

B. Limitations as recited in claim 5, line 5 include “the top or bottom surface is electrically connected with the circuit of the interposer”.

C. Limitations as recited in claim 8, line 8 include “the upper or lower surface is electrically connected with to the circuit of the interposer”.

However, as disclosed in the specification including Fig. 1B, only the top surface of the chip is electrically connected to the circuit board/interposer using the metal wires.

Allowable Subject Matter

3. Claims 1-14 would be allowable if rewritten to overcome the above 35 U.S.C. 112 rejection.

Reasons for Allowance

4. The following is an examiner’s statement of reasons for allowance:

The references of record do not teach the limitations “a sealing layer composed of a resin positioned on the entire top face of a semiconductor chip and a portion of the top face of the wiring substrate; wherein a thickness of the sealing layer on the top face of the semiconductor chip is smaller than a thickness of the sealing layer on the portion

of the top face of the wiring substrate” and “wherein the sealing layer is formed such that a periphery of the sealing layer has an angle of 30-60 degrees with respect to a corresponding side of the circuit wiring substrate” in a resin sealed area array device having a chip wire bonded on a top face of a circuit wiring substrate.

Conclusion

5. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the mailing date of this final action.
